

Reyton Bearing Grease BRX-99

Grease

Product Data Sheet

PRODUCT DESCRIPTION

Reyton Bearing Grease BRX-99 is a bentone based grease designed and formulated with anti-wear agents maximizing wear protection. Reyton Bearing Grease BRX-99 provides excellent service under conditions of moisture and starvation.

BENEFITS

- Smooth texture
- Superior wear protection
- High water resistance
- High lubricity
- High adhesion to the surfaces

FEATURES

Reyton Bearing Grease BRX-99 is a bentone based grease formulated with anti-wear agents for use in most occasions.

APPLICATIONS

- Different types of bearings
- Cams, ways, and other sliding elements
- Parts where both water and high operating temperature are expected
- Agricultural equipment, construction machinery, machine tools, fifth wheels, logging equipment, and fresh salt water dredges.

TESTS	RESULTS
Color	Amber
Structure	Smooth
Soap Type	Bentone
NLGI Grade	3
Penetration	230
Dropping Point, °C	300°C (non-melt)
